Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999

(AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002

do not apply when the reference is a U.S. patent resulting directly or indirectly from an

international application filed before November 29, 2000. Therefore, the prior art date of the

reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA

35 U.S.C. 102(e)).

2. Claims 1,3-5,7,8,11-16,18-19 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Caruso et al. Caruso et al. shows a chair comprising: a seat (22) attached to a base (20); a backrest (32); and first and second arms (50), each including an armrest (304), an armrest support (302) and a backrest support (200) rigidly connected to the armrest support and the backrest, the backrest support having a flexible center portion comprising a pre-stressed spring element (80) that enables the backrest to pivot by bending the flexible center portion.

3. Claims 18-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Ball ('898).

Ball shows a chair comprising: a seat (53) attached to a base; a backrest (127); and first and

second arms (61), each including an armrest (64), an armrest support (105) and a backrest support (57,60) rigidly connected to the armrest support and the backrest as the only support for the backrest. The backrest support comprises spring element (130), which is tensioned and therefore inherently “pre-stressed”. Ball further shows the use of an armrest height adjustment (62) that simultaneously adjusts the height of the armrest and backrest simultaneously.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 9-10,12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Caruso in view of Adams et al. Caruso et al. shows all of the teachings of the claimed invention except the use of a supplemental backrest support. Adams et al teaches the conventional use of a supplemental backrest support (14), which comprises a rod (14) that slides within a slot of a bracket (50). It would have been obvious to one of ordinary skill in the art to modify the backrest of Caruso et al with the supplemental backrest support of Adams et al., in order to provide additional support when adjusting the backrest.

Allowable Subject Matter

6. Claims 6 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

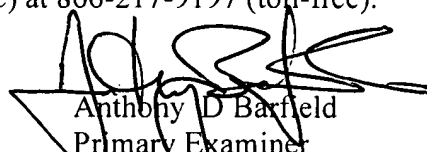

7. Applicant's arguments with respect to claims 1,15 and 18 have been considered but are moot in view of the new ground(s) of rejection. In response to applicant's argument that Ball et al., fails to teach a "pre-stressed" spring, the examiner is of the opinion that the spring (130) of Ball, which is in tension, is inherently "pre-stressed."

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference Nos. 4,703,974 and 6,557,939 show features of the claimed invention.
